

# Welcome to the 1st Uppsala Water Centre (UVC) Mini symposium for early career scientists

2017-06-07 13.00 - 17.00  
Geocentrum, Villavägen 16

- Do you define yourself as an early career scientist?
- Are you curious to know what ongoing research in Uppsala complements yours?
- Do you want to build your local scientific network and find opportunities to develop future collaborations?

If yes, then join us at the UVC symposium-mixer!

Uppsala Water Centre is hosting a mini symposium and social mingle for early career researchers. We invite all young researchers within the Aquatic, Soil and Earth Sciences to discuss their work with the local scientific community. The symposium includes a poster session where participants can present their current projects, followed by a social mingle.

### Three excellent reasons to join:

#### *1. Research call*

Uppsala Water Centre will announce a research call in the fall of 2017, which is an opportunity for early career researchers from two different departments to apply for funding together (up to 100 000kr). Why not take the opportunity to discuss ideas and possible collaborations at the mingle?

#### *2. Help!*

In research we all need help from time to time, maybe you are looking for someone who knows more about hydrology, microbial activity or environmental chemistry? You are likely to find the right person at the symposium, in addition working in the same city. In fact, you might find answers to questions you didn't know you even had!

#### *3. Have a nice time*

It's a great opportunity to meet nice people and have some free food and drinks (no more arguments needed)!

#### **Preliminary schedule**

13.00 Poster session

14.30 Coffee

15.00 Group discussions on various themes with networking exercises

16.00 Free mingle including free food and drinks

17.00 Pub

**NOTE:** The poster session is intended to be a non-intimidating forum to present results and ideas to other young researchers. If you have recently presented work at a conference and are looking for further feedback, this could be an ideal opportunity.

### **Get registered, at latest 31/5!**
