

Looking for a PhD position?

A 3 years PhD studentship is available to work on the molecular regulation of the environmental control of plant development at the plant plasticity lab of the IBMCP in Valencia, Spain (<http://plasticity.ibmcp.csic.es>).

The position is fully funded and the student will work in a vibrant scientific environment under the supervision of Prof. Miguel Blazquez and Dr. Javier Agusti.

The IBMCP institute is embedded in the Polytechnic City of Innovation at the Polytechnic University of Valencia Campus, where more than 20 research institutes coexist in a multidisciplinary scientific community that ranges from chemical technology to nanomaterials or synthetic biology.

For more details on the position please contact us **before the 15th of April**:

mblazquez@ibmcp.upv.es
jagusti@ibmcp.upv.es

The contract will start on the 19th of September.
